ona VGA to HDMI Scaler/Converter (USB Powered). Model: AT-HDVieW50

Atlona AT-HDVieW50 is designed to take video and audio signal from PC or Laptop and upscale it to digital HDMI output of wide-range HDTV and PC olutions, up to 1080p. The AT-HDVieW is a plug and play device, it will automatically sense the native resolution of the display and scale the computer's out to match it. The converter will take audio signal from the computer and embedded it into the HDMI signal output, so that user is able to enjoy both io and video though one cable. The HDVieW50 is a scaler-converter, which means that it will always work without any adjustments to the video card ware in addition to that the video quality will be dramatically increased due to the built-in high quality scaler. The Atlona converter is USB powered and efore will not require additional power supplies.

e: The Atlona AT-HDVieW50 was only designed to work in Europe, Asia, South America, Africa and Australia. The output signal is only 50Hz and efore will only work within the continents listed. If you are located in North America, please look at our model AT-HDVieW
